TRANSPORT • PLANT HIRE • TRUCK HIRE

"SERVICE BEYOND EXPECTATIONS"

# ABOUT US

Makhushu transport is a company that is aspiring to play a huge part in the transport, plant hire and logistics industry by delivering a variety of high quality services. Our main focus is to fill and improve the gap that exists in the transportation of materials and services in South Africa and neighbouring countries, by providing our clients with quality, fast and reliable transport solutions.

As a company we have analysed the current position that our economy is in, and we have identified that there is a large need in the transport industry which needs to be addressed and catered for. We are aiming at working hand in hand with the government, private sectors and eventually international partners so that we may enhance the standard of living in the disadvantaged communities by providing them with quality and reliable service delivery that they require, and also providing them with employment.

## VISION

Our vision at Makhushu Transport is to provide our consumers with quality and reliable services at all times. We have aspirations of being the most reliable, affordable, fastest and high quality service providing company in its field of expertise, and we work towards meeting our consumers' needs through our desire, loyalty, modernization and assurance.

## MISSION

Our mission at Makhushu Transport is to contribute and improve the overall service delivery in the transport industry provincially, nationally and internationally . We plan to cater to our clients every need by providing them with quality services, using our fast and reliable resources to ensure the satisfaction . Inevitably, we are working towards being a major role player and household name within the transport and logistics industry. We aim at providing quality services through:

Innovative and reliable solutions for our clients

Accurate and precise delivery of products and services

Employment of competent drivers from previously disadvantaged communities

Establish and maintain a good relationship with our clients

# OUR PROPOSITION

Supply chain & Logistics are the lifeblood of any organisation, whether profit, non-profit, private or public entity. Given the complexities, risks and financial implications associated with fleet management failures, it is critical that organisations have a well-defined services inventory, which must articulate how the organisation plans to ensure it transports its resources safely, efficiently and effectively throughout their lifecycle, that is where we come in as Makhushu.

Supply Chain & Logistics is a multi-disciplinary function which we provide with knowledge, skills and competencies in fleet management, maintenance.

Industrial resources transportation (minerals)

# DRIVER SAFETY AND AWARENESS

Makhushu Transport has its own SHEQ officer who ensures that on appointment, every driver goes through a strict induction process and safety awareness programme. This induction and awareness programme is a prerequisite for all the drivers at Makhushu transport. Due to the nature of our fleet and variety of clients, some of the drivers are required to possess different certificates for operating certain equipment which accompanies their trucks, e.g. cranes and slings. We view all our employees as valuable assets to Makhushu transport and we finance all the necessary training that is required.

- All drivers upon appointment are issued with two sets of the necessary protective clothing which includes reflective overalls, reflective waist coat, safety boots, safety glasses, gloves and a helmet. Where drivers will be working with hazardous substances or products, safety precautions will be taken to meet our clients expectations.
- In transport a majority of the accidents are due to drivers being fatigued due to working long hours, that is why at Makhushu transport we have incorporated double drivers per truck with each driver handling either day or night shift, this is to ensure that no driver is exploited or worked beyond their ability. We have a tracking system in every truck which allows us to monitor their behaviour and locate the whereabouts of your products at all times, we have also went the extra mile and ensured that none of our trucks exceed the speed limit of 80km per hour to reduce the possibility of accidents

## VEHICLES & EQUIPMENT

Makhushu transport owns and operates a substantially large fleet of trucks and trailers. The trailers consist of side tippers, flat deck tri axles, back tippers, flat decks, interlinks, lowbed's and step decks. Some tri axles are equipped with cranes, uprights and chains, while others are fitted with side uprights. We ensure that all our trailers are issued with the necessary tarpaulins and load straps which will be suitable for the task at hand. We keep equipment such as load straps and Satan's at the depots and offices to ensure their availability when they are required.

We ensure that our fleet is up to date with the newest technology and specifications. We guarantee vehicles that are in good condition both in appearance and reliability. The main supplier of our trucks is MAN and Scania

## OUR CLIENTS

Due to our expertise and knowledge, we have been operating in the transport industry for over a decade. We ensure quality service delivery and satisfaction to all our clients. We help out many companies and individuals to carry out their contracts with various companies
